This article has been retracted.

Retraction date: December 06, 2021. Cite this retraction as Farzam K, Zarei K (December 06, 2021) Retraction: Light Chain Glomerulopathy Causing Kidney Failure in Renal Cell Carcinoma. Cureus 13(12): r38. doi:10.7759/cureus.r38.

This article has been retracted at the request of the submitting author, Khashayar Farzam, as the University of Iowa Hospitals & Clinics patient consent procedure was not properly followed by the authors when preparing this manuscript. Written consent was required from the patients, but only verbal consent was obtained. Due to the rarity of this condition and the inclusion of specific case details, the article content has been removed in order to avoid any potential privacy violations. The authors would like to apologize for their mistake as they believed that verbal consent was sufficient.

Abstract

RETRACTED (Contents removed due to potential privacy concerns.)

Categories: Internal Medicine, Oncology, Hematology

Keywords: multiple myeloma, light cast chain nephropathy, light chain deposition disease, renal cell carcinoma, systemic capillary leak syndrome

Introduction

RETRACTED (Contents removed due to potential privacy concerns.)

Case Presentation

RETRACTED (Contents removed due to potential privacy concerns.)

Discussion

RETRACTED (Contents removed due to potential privacy concerns.)

Conclusions

RETRACTED (Contents removed due to potential privacy concerns.)

Additional Information

Disclosures

Human subjects: Consent was obtained or waived by all participants in this study. **Conflicts of interest:** In compliance with the ICMJE uniform disclosure form, all authors declare the following: **Payment/services info:** All authors have declared that no financial support was received from any organization for the submitted work. **Financial relationships:** All authors have declared that they have no financial relationships at present or within the previous three years with any organizations that might have an interest in the submitted work. **Other relationships:** All authors have declared that there are no other relationships or activities that could appear to have influenced the submitted work.
